This trial had an accidental herbicide application that damaged the barley early in the season. Not all the varieties recovered. None of the data recorded in this trial will be included in the 3-yr barley means.

Rating scale, area of upper leaves affected except for BYDV which is measured as a percentage of plants showing symptoms:

1 = 0-3%

2 = 4-14%

3 = 15-29%

4 = 30-49%

5 = 50-69%

6 = 70-84%

7 = 85-95%

8 = 95-100%
